EDUCATION

SRM University

Bachelor of Technology in Computer Science, Specialization With Big Data Analytics
CGPA: 9.34

Chennai

Jun-2022 – May 2026

Infant Jesus Matric Hr Sec School

Higher Secondary Education
Percentage: 90.3

Kanchipuram

June 2021–May 2022

EXPERIENCE

Data Analytics Intern

Amdox Technologies

May 2026 – July 2026

Remote

- Developed a Financial Fraud Detection System using machine learning to identify fraudulent transactions, cutting false negatives and enabling faster risk decisions
- Built a Neural Retail AI Dashboard to analyze sales, inventory, and customer behavior data, providing interactive visualizations and business insights for data-driven decision-making
- Designed a Personalized Healthcare Recommendation System predicting diseases from patient symptoms, improving diagnosis-support accuracy for end users

Data Analyst

Opportive

Jul 2025 – Aug 2025

Remote

- Worked as a Data Analyst Intern at Opportive, applying data analysis and machine learning techniques to solve real-world problems
- Developed a Sentiment Analysis on Social Media project to classify and analyze public opinions from social media data
- Built a Text Summarization using NLP system to automatically generate concise and meaningful summaries from large textual content

PROJECTS

Detecting and Enhancing Wildfire Detection Using HyperFusionTransFireNet | *Python, Deep Learning*

- * Developed a deep learning-based wildfire detection system for accurate early fire identification.

Brainwave Based Authentication System | *Python, Machine Learning, Random Forest, EEG*

- * Developed an EEG-based biometric authentication system using Random Forest for secure user verification.

Sentiment Analysis on Social Media | *Python, NLP, Machine Learning*

- * Built an NLP-based sentiment analysis system for classifying social media opinions.

AI Business Intelligence and Analytics Platform | *Python, Streamlit, SQL, Machine Learning*

- * Developed an AI-powered analytics platform featuring interactive dashboards, SQL analytics, sales prediction, business insights, and automated PDF reporting.

TECHNICAL SKILLS

Languages: Python, SQL, MS Excel, Power BI, Tableau, Basics in Data Structures and Algorithms

Developer Tools: GitHub, Google Colab, VS Code, Visual Studio, Jupyter Notebook

Frameworks/Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, Flask, Streamlit

Core Concepts: DSA, OOPS, DBMS, Machine Learning, NLP, Generative AI, LLM, RAG

Certifications: NPTEL - Programming in Java

Data Analytics Job Simulation - Tata Group (Forage)
